SKILLS

Languages

Python · SQL · C++ · Java

AI / ML

LangChain · LlamaIndex · RAG ·
PyTorch · TensorFlow · scikit-learn ·
OpenCV · Librosa

Cloud & Infra

Azure OpenAI · Azure AI Search · Azure
Functions · Docker · FastAPI · Flask

Data

Pandas · NumPy · Matplotlib · Power
BI · Roboflow

Principles

OOP · System Design · REST APIs ·
Agile

Linux & Infra

Linux (Fedora) · Bash Scripting · Docker
· Networking · Self-hosted Services ·
System Administration

Tools

Git · GitHub · Jupyter · VS Code ·
PyCharm

EDUCATION

MSc Computer Science

Università di Milano
2021–2024 · 110/110
*Thesis: Audio-Based Covid-19
Detection via Cough Analysis*

BSc Computer Science

Università Bari Aldo Moro
2018–2021 · 105/110

LANGUAGES

Italian — Native
English — C1
Portuguese — B1

Mattia Palano

AI Engineer · Open to Remote & Freelance

AI Engineer with 3+ years taking projects from prototype to production — RAG systems, computer vision pipelines, LLM backends on Azure. MSc in Computer Science (110/110). I work well autonomously, move fast, and own what I build. Available remotely, worldwide.

WORK EXPERIENCE

AI Lab Specialist I · BIP AI Lab

Jun 2025 – Present · Bari, Italy · Remote

- Leading applied AI research and LLM system design within BIP's AI Lab, focusing on enterprise-grade generative AI.
- Architecting and evaluating next-gen LLM pipelines; translating research into production-ready solutions.
- Cross-functional ownership: from problem scoping to deployment, across NLP, document intelligence, and multimodal AI.

AI Engineer · Intellera Consulting

Jun 2025 · Rome, Italy

- Designed RAG architectures from scratch (LangChain, LlamaIndex, Azure OpenAI) — enabling chatbots to reason over private corporate knowledge bases with measurable accuracy gains.
- Engineered automated document intelligence pipelines (Azure AI Document Intelligence + NLP) processing PDFs, images, and reports at scale.
- Built and maintained production FastAPI backends with clean OOP design, serving as the AI layer between models and frontend; deployed on Azure Functions and App Services.

AI Developer · TR2 S.R.L.

Oct 2024 – Feb 2025 · Aosta, Italy · Remote

- Sole developer: designed, trained, and deployed computer vision models now running on camera networks across Italy — full system design ownership from data pipeline to production.
- Built robust Python backends integrating real-time sensor and camera streams; ensured reliability in 24/7 production environments.

Secondary School Teacher — ICT & C++ · IIS Galvani

Oct 2023 – Aug 2024 · Milan, Italy

- Taught C++ and OOP principles (classes, inheritance, polymorphism, data structures) alongside Web Design and Systems & Networks; introduced AI/ML to students with zero prior exposure.

Sound Operator · LKT Entertainment

Jul 2022 – Sep 2022 · Chioggia, Italy

- Managed audio/multimedia systems for live events; handled AV sync, digital mixing, and on-site troubleshooting under pressure.
